

PVC FLOOR (LANE) MARKING TAPE

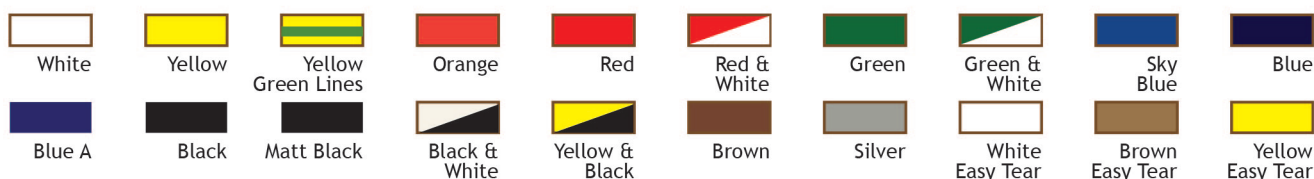

Product Features

Premium Grade PVC Film Coated with Natural Rubber Adhesive for Marking Purposes

Application

Widely used in facility floor, lane, hazard warning, aisle marking, colour coding canister and storage container sealing, bundling, reinforcing, decorating and industrial applications

Technical Data

Product	Total Thickness		Peel Adhesion	Tensile Strength	Elongation % at break	Unwinding strength
	(um)	(mil)	(N/in)	ASTM D-3759 (N/cm)	ASTM D-3759	(N/cm)
FMT13	130	5.1	3.75	40	130%	2-4
FMT15	150	5.9	3.75	40	140%	2-4
FMT18	180	7.1	3.75	45	150%	2-4

Product Sizes

Log Roll Size :1250mm x 30m
 Paper Core Size :76mm
 Cut Sizes :48mm x 30m
 (*Custom sizes available)

Shelf Life

12 Months Storage at 23°C and 65% Relative Humidity

Product Characteristics

- Highly Conformable
- Resistant to aging, UV, water, fungus, bacteria, oil, acid, alkali, solvent and corrosive chemicals
- Anti-abrasion and excellent tensile strength
- Excellent adhesion and good cohesion strength
- Excellent flexibility and good adhesion on uneven shapes and irregular surfaces, highly durable, unrolls quickly and easily tacks into any dry surface
- Can be easily removed without damaging the floor or leaving adhesive residue
- Use indoor and outdoor due to good insulation
- High visibility due to the striking bright colours makes a great contrast with the floor which makes it very noticeable when entering the specific area, offers the same visibility as painted floor markings, but cost much less
- Rubber adhesive provides excellent holding strength on many surfaces
- Ideal for marking of internal sporting courts such as volleyball court, football court as well as badminton court
