

# PROTECTIVE FILM FOR CERAMIC

## Product Features

Special Formulated Polyethylene Film as Substrate and Solvent / Water as Pressure Sensitive Adhesive

## Application

Provide surface protection for ceramic tile and other ceramic products

## Technical Data

Base Film Thickness (µm)	30-200
Adhesive Thickness (µm)	2-20
Peel Strength 180 °C (g/cm)	30-180
Horizontal Elongation at Break (%)	300-600
Vertical Elongation at Break (%)	200-300
Heat Resistance (°C)	60

## Product Characteristics

- Good stability of the pressure sensitive adhesive
- Flexible & soft
- Anti-corrosion
- No residue left after removal

## Product Sizes

Roll Size : (500-2100)mm x (500-1500)m

## Shelf Life

12 Months Storage at 23 °C and 65% Relative Humidity
