About Sticky Mat

Cleanroom sticky mats and rollers are usually used to capture dirt and dust from foot-traffic, equipment wheels, floors and walls. These will help to quickly and easily pick up loose and semi-loose particles.

Our Sticky Mats and Sticky Rollers are premium quality. These products are manufactured by our own factory under strict ISO quality control regulations.

All products meet the most stringent requirements for cleanroom and controlled environments. We make cleaning more time-efficient and cost-effective therefore providing convenience to everyone.

About Sticky Mat

Our sticky mat are made by high quality low density polyethylene materials and water-based adhesive.

Clean room mats are tacky mats that help trap impurities for locations that require stringent dust and dirt control. Our cleanroom sticky mats feature a tacky surface which removes dirt and dust from shoe surfaces before they can contaminate a "clean room."

Sticky mats can effectively capture and remove the last traces of contamination on shoes or wheels at entrances of regulated or critical areas. Several levels of stickiness are available for use with various shoes and booties.

Disposable sticky mat, Consecutively numbered tabs help keep track of the remaining sheets and prevent multiple sheets from being removed inadvertently.

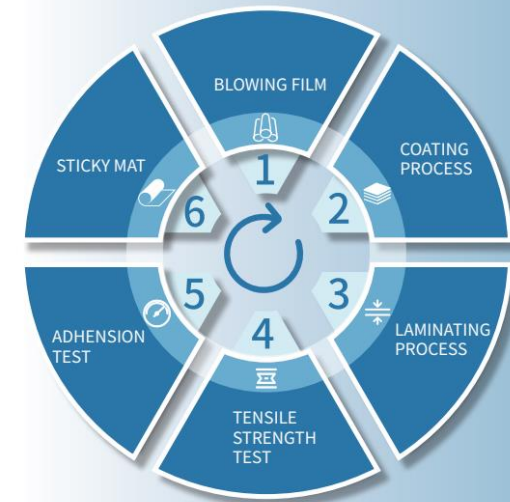

Process Flow Diagram

KEEP YOUR ROOM CLEAN

Sticky Mats are manufactured to create a stack of polyethylene film sheets coated with a specially treated pressure-sensitive adhesive on the exposed and mounting surfaces. Before entering the protected, controlled environment, the mat adhesive film captures dirt and dust from foot traffic and equipment wheels (or wheelchairs).

SAFE MATERIAL

- The plastic film layers are polyethylene films produced via high-pressure technology. This method eliminates the use of heavy metal catalysts, and no measurable amounts of cadmium, chlorine, sodium, or lead are present in the film. Also, the pressure-sensitive adhesive is acrylic based and free of metal cross-linking agents. The top and bottom release polyethylene films contain no coatings and are free from Silicone/Amine /Amide/DOP/ Benzoic Acid.

GOOD QUALITY

Our sticky mats typically come in 30 sheets per pad and have corner tabs consecutively numbered to show the remaining sheets. Also, our premium sticky mats have a specially developed adhesive coating designed to effectively reduce dirt by trapping and preventing the transfer of particles.

MULTIPLE USES

These adhesive mats are widely used in a variety of industries, including Semiconductor, Biotechnology, Medical Device workshop, and reception environments (e.g., Mechanic Shop to Reception Desk)

The mats are ideal for a wide range of applications, including cleanroom entrances, gowning rooms, laboratories, homes, hospitality industry, food prep locations, or work stations requiring high contamination control.

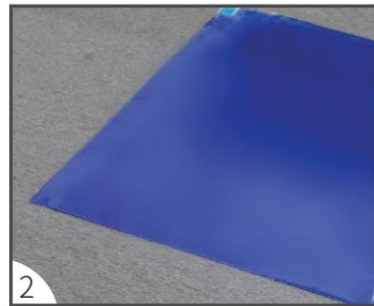

Sticky Mat

- To keep dust and contamination debris from entering a sterile environment.
- Minimize dust particles from entering underneath a doorway
- Placing a Mat outside of a Pet entrance or in a Garage entrance can help reduce waste from entering a home.
- Ideal for constant visitor traffic building entrances. Like Hotels, Motels, Airbnb Rentals, Real Estate Showings
- Suitable for a transition between workshop and reception environments (e.g. Mechanic Shop to Reception Desk)

How to use the sticky mat ?

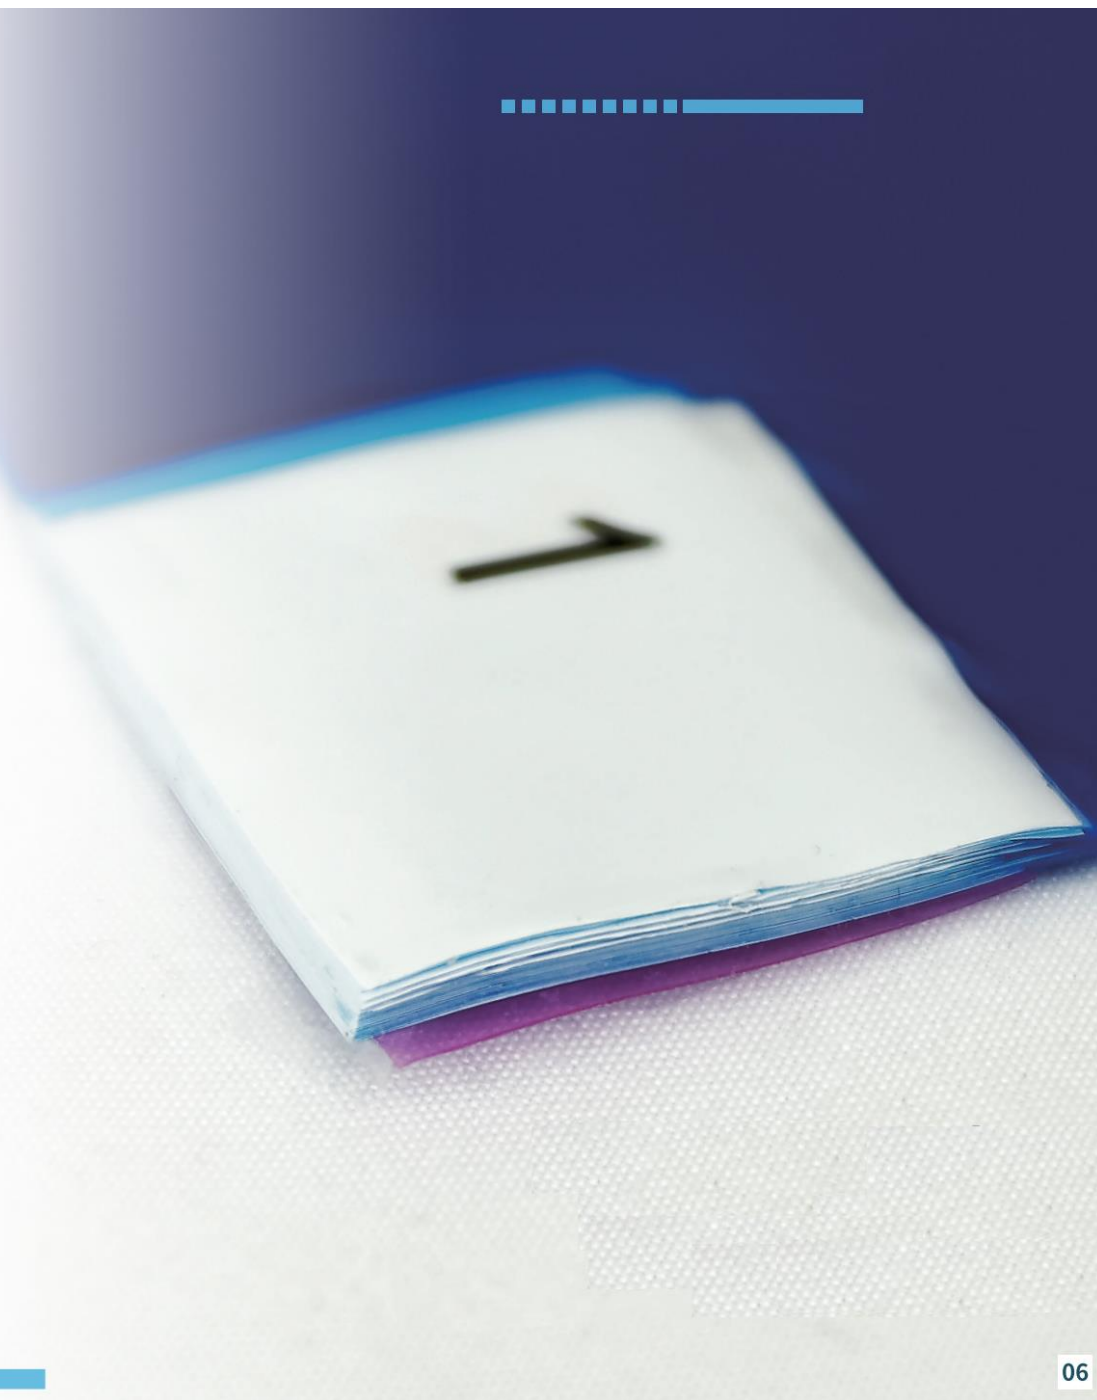

1. Clean the floor where the mat is pasted to until it gets dry, then peel off the bottom clear protective sheet.
2. Adhere the edge with the adhesive to the cleaned floor carefully and tidy the mat with a dry cloth; keep the mat pasted
3. Peel off the top sheet from the label attached to the corner. Then start to use.
4. When the first layer becomes dirty, peel off that sheet from the label and then use the second layer.

Tacky Roller

PRODUCT INTRODUCTION

Tacky Rollers provide the most efficient means of removing even the smallest particles from flat surfaces such as walls, tabletops, floors, ceilings, etc. The lifting action of the roller limits particulates as it passes over the surface. The adhesive on the sticky film removes contaminants and provides an inhibitor to prevent microbial growth, making it suitable even for non-cleanroom use. The specially designed rollers capture and transfer particles and contaminants from surfaces to adhesive rolls.

Environment-friendly material especially formulated water-based adhesive treated with an anti-microbial agent.

Each roller is individually wrapped for easy storage and cleanliness. Adhesive roller handles are sold separately.

PE Sticky Roller

KEEP YOUR ROOM CLEAN

PE sticky roller is mainly used in cleanroom environments. It can speedily and effectively clean the ground, housetop, ceiling, wall, desk, and other surfaces.

SAFE MATERIAL

The roller comprises 100 layers of PE film with coated adhesive and is packaged with transparent protective film. The plastic film layers are composed of low-density Polyethylene film, coated with environment-friendly material specially formulated water-based adhesive treated with an anti-microbial agent.

GOOD QUALITY

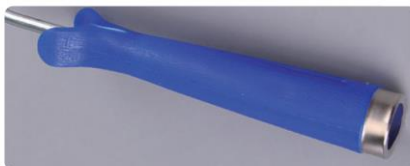

PE sticky roller consists of the roller and handle. They are easy to use and disassemble. Just roll it on the surface that needs cleaning; when the roller is dirty and full of dust, follow the folded line and peel off the used sheet.

MULTIPLE USES

PE sticky rollers are widely used for semiconductor and electronic manufacturing and other critical environments. It prevents secondary contamination effectively. PE Sticky Roller has a soft surface texture that ensures the removal of the contaminants without leaving traces and scratches during use. These are mainly used for the surface of PCB, desktops, equipment panels, and many more.

Silicone Sticky Roller

KEEP YOUR ROOM CLEAN

Silicone sticky roller is widely used in circuit boards PCB, LCD, light guide plates, precision printing, SMT, cleanroom, semiconductor, and other industries production, the cleaning tools for surface treatment.

SAFE MATERIAL

Silicone sticky roller, a silicone roller made of silicone and pivotal material, is a self-adhesive removing product. It uses a patented anti-static, soft, and sticky silicone material that sinks into the hard-to-reach areas to lift out deep-rooted dust, lint, and grime.

GOOD QUALITY

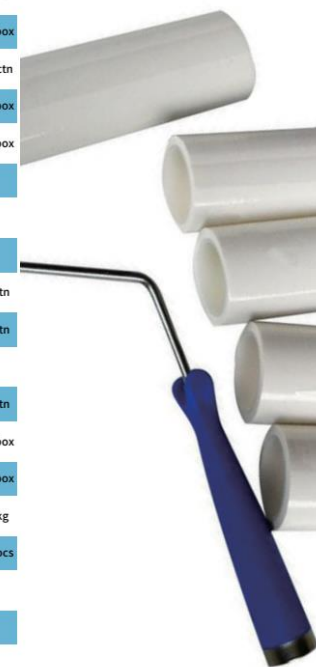

Silicone roller's surface is smooth like a mirror and can capture micro contaminants even under 2μm diameter. It is effective in removing tiny impurities, dust, and dirt. Silicone roller can be used about 9000-10000 times, and no need for any cleaning chemicals. The dirt on the surface of the roller can be transferred to the sticky mats, or you can gently rinse the roller under running water every couple of uses to remove any particle buildup. Then the sticky rollers can be reused for your next cleaning session.

MULTIPLE USES

- Perfect for safely applying films of cars, windows, and LCD. It would efficiently clean your LCD screen and other glass surfaces. Silicone sticky roller also can remove dirt and fingerprints from CDs, DVDs, Blu-Rays, computer/laptop screens, iPad /iPhone/iPod Touch, or any parts of a cell phone that attracts lint, dust, or fingerprints

Sticky Swab/Pen

Application

It cleans tiny particles on the camera lens, sensor, industrial glass, quartz glass, and lenses. It will not leave traces (glue) after cleaning.

And it is used in high standard cleanliness cleanroom. It has low adhesiveness.

It has good absorption. It mainly cleans the dust ions on the exposed surface of the coated SENSOR in COB process.

Clears (10-5000 clean room) LED/LCD surface PARTICLE.

Cleans the debris and dust on the surface glass of the LENS.

Product List

NO.	Part No.	Product description	Packing	Carton size (L*W*H)	Weight (Kg/ctn)
97	CM-SS-P2	Plastic handle sticky swab, Total length:75mm, Diameter = 2mm	100pcs/box, 6000pcs/ctn

102	CM-SS-S2	Stainless handle sticky swab, Total length:75mm, Diameter = 2mm	10pcs/box, 3000pcs/ctn		
103	CM-SS-S3	Stainless handle sticky swab, Total length:75mm, Diameter = 3mm	10pcs/box, 3000pcs/ctn		

ESD sticky glue sticks are designed for a spotless and dust-free environment (class-10-100). The raw materials used are highly clean, dust-free, ion-free, and allergen-free and have excellent chemical corrosion resistance function; anti-static treatment that can safely dissipate charges, not affected by environmental changes. Therefore, it is suitable for the manufacturing and assembly cleaning of electrostatic-sensitive products.

Sticky Roller

EASY TO USE

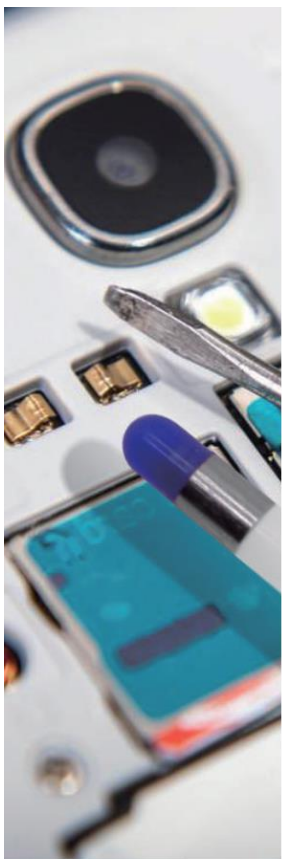

Sticky Rollers are as easy to use as a simple paint roller. Just roll the area to remove dust particles.

Adhesive Rollers provide a cost-effective and convenient way of cleaning walls, floors, ceilings, and other smooth surfaces in your controlled environment. When the roll gets soiled, tear off the outer sheet for a fresh tacky adhesive sheet.

Product List

The sticky rollers are ideal for many applications, including microelectronics, computers, and the food and refrigeration industry. In addition, labs, semiconductors, instrumentation, aerospace, nuclear industries, Surgical rooms, medical devices, pharmaceuticals, and any other dust-free environment or workstations that require high contamination control levels.

Part No.	Product description	Packing	Carton size (L*W*H)	Weight (Kg/ctn)
ROLL-04W	Sticky Roller, White, Inner diameter: 38mm	Size: 4", 200pcs/ctn	55*29*42cm	19.86kg

Sticky Pen

Application

It is use to clean the tiny particles on the camera lens,sensor and industrial glass, quartz glass, lenses won't leave traces (glue) after cleaning .

And it be used in the high standard cleanliness cleanroom . It is low adhesive.

It has good adsorptivity. It mainly cleans the dust ions on the exposed surface of the coated SENSOR in COB process.

Clear (10-5000 clean room) LED/LCD surface PARTICLE.

Clean the debris and dust of the surface glass of the LENS.

PEN-SI

ESD Sticky Silicone Pen is a dust-removing product with self-adhesive, which can remove particles, fibers, copper filings in the course of production.

Sticky Silicon Pen is made of high-quality Silicone to enhance high adhesive performance.

HEAD MATERIAL	ESD glue head
HEAD DIAMETER	2mm,3mm
TOTAL LENGTH	75mm or 150mm
HANDLE MATERIAL	plastic handle,transparent handle, Stainless handle
PACKING	133mm, 10pcs/bag
SHELF LIFE	1 year , reusable , washable by water
